

FL-25 High-Solids Alkaline Cleaner

FL-25 High Solids Alkaline Cleaner can be used to degrease any surface. It is widely used as a pressure washing fluid and can be sprayed or applied on machinery or floors. FL-25 is also useful as an exterior truck and machinery cleaner.

Highly Effective – FL-25 will attack most petroleum based deposits, grease, oil, light tar, bunker fuels, and more.

Highly Dilutable – Because FL-25 is so concentrated, it can be diluted more than most competitive products, providing superior cost-effectiveness.

Non-Flammable – FL-25 is water based and has a flash point above 200°F, so it can be used in either production or maintenance cleaning operations.

Waste Treatable – FL-25 contains a special surfactant package to allow fast and effective waste treatment.

Versatility – FL-25 can be used in pressure washers, dip tanks, automated spray washing systems, or automated floor scrubbing equipment.

Paint Compatibility – When diluted, FL-25 is safe to use on most industrial paint and coatings.

Note: Always test compatibility in a small inconspicuous area.

Handling – Consult the MSDS Sheet, and follow all label precautions and instructions before using this or any industrial chemical.
